

The <u>Cognitive Science Laboratory</u> at the University of Manitoba invites applications for a postdoctoral researcher to help develop and test computational models of cognition in relation to memory, learning, knowledge representation, and categorization. The particular topic of focus will be collaboratively decided based on the overlap between the lab's and the applicant's expertise and interests.

The position will be full time with an initial appointment of 1 year with possible renewal for a second year. Salary will be \$50,000/year plus benefits according to University of Manitoba guidelines. Start date is flexible but a start date of September 1 2024 is ideal.

Applicants must have a PhD in cognitive psychology or cognitive science. The preferred candidate will have the following qualifications:

- Experience and skills in computational modelling of cognitive and memorial processes
- Experience and skills in experimental design and online data collection
- Strong writing skills
- An interest in instance/exemplar-based approaches to understanding cognition

Interested individuals can apply by emailing a cover letter, CV, copies of relevant publications, and contact information for two referees. Applications and/or questions can be emailed to Randy Jamieson at <u>randy.jamieson@umanitoba.ca</u>.

Review of applications will begin immediately and continue until the position is filled.

Randall K. Jamieson, Ph.D. Department of Psychology University of Manitoba Winnipeg, MB, Canada
